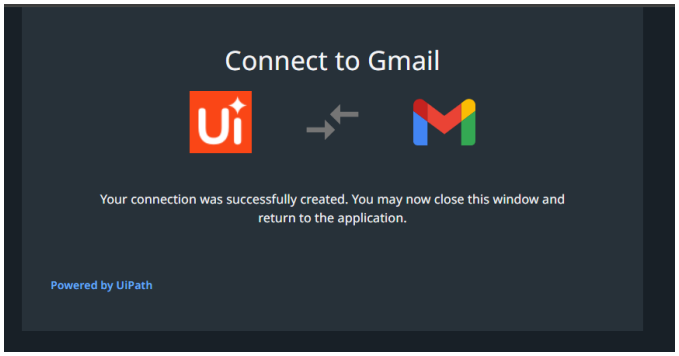
Connect to Gmail
Connecting allows UiPath products to interact with Gmail data on your behalf. This may include read, write, modify and delete data, depending on your Gmail permissions.
Ask Autopilot for help
Folder in which connection is stored
My Workspace
Authentication Type
OAuth 2.0 Authorization code
Scope
openid
https://www.googleapis.com/auth/userinfo.email
https://mail.google.com/
https://www.googleapis.com/auth/calendar
https://www.googleapis.com/auth/userinfo.profile
https://www.googleapis.com/auth/gmail.labels
Search scopes...
openid and https://mail.google.com are mandatory for connection creation. Adding additional scopes is not allowed, but non-mandatory scopes can be removed. Find authentication guidance here. Find activity-specific scopes here: Gmail and Calendar.
Connect
The current session will timeout in 8:09



Connect to Gmail
Your connection was successfully created. You may now close this window and return to the application.
